01. Market Commentary

DSEX ended in green for the week increasing by 78.42 points [1.65%] compared to the previous week. It stands at 4832.83 points.

The index extended its winning streak for the third time after undergoing a deep downward trend for almost two months. Although the index had started the week on a heavy sell off due to geopolitical instability in the middle east region, the ceasefire that followed helped to ease the volatility of the market. Coupled with the recent approval of the IMF loan tranches along with discussions regarding the BDT 200 Crore special fund set up by scheduled banks for investment in the capital market, investors were seen buying scrips which was heavily discounted. The buying pressure also continued on as investors sought to park their funds in the scrips as to avail tax rebates for the tax year 2025-26. Overall, the index is up by 4.20% since May 29.

Investor participation increased this week as reflected by increase in average daily turnover by around 11.43% causing the average daily turnover to rise above the BDT 350 Crore level. Investors' trades in this week focused on Food & Allied scrips followed by Pharmaceuticals and Bank scrips. In terms of sectoral returns, the Travel & Leisure sector registered the highest gain of 5.44% while the Miscellaneous sector suffered the worst with -0.47% return.

Market capitalization stands at USD 53.9 Billion*.

*(USD 1 = BDT 122.76 as on June 26, 2025).
