01. Market Commentary

DSEX ended in red for the week decreasing by 34.80 points [0.64%] compared to the previous week. It stands at 5415.13 points.

Index continued its downward momentum for the third straight week as sellers preferred to take short term gains from the previous bull run of the market. Profit taking took place in the beginning sessions of the week, causing the index to fall by more than 100 points. However, the buyers chipped in in the later part of the week taking longs into those lucrative scrips in hopes for capital gains in anticipation of June ending earnings declaration. Many of the investors were in the sidelines and preferred to observe the market activity as reflected by the continuous fall in trading activity.

Investor participation decreased further as reflected by decrease in average daily turnover by around 17% causing the average daily turnover to fall below BDT 600 Crore level. Investors' trades in this week focused on Textile scrips followed by Pharmaceuticals and Bank scrips. In terms of sectoral returns, the Services & Real Estate sector posted 3.75% return while, the Bank sector went negative 1.89%.

Market capitalization stands at USD 59.4 Billion*.

*(USD 1 = BDT 121.83 as on September 25, 2025).
