01. Market Commentary

DSEX ended in red for the week decreasing by 265.25 points [5.34%] compared to the previous week. It stands at 4702.69 points.

Index went negative for the third consecutive week with a significant fall above 5% and settled at 4700 level last seen on 23 June of 2025. The investors, in absence of any favorable market catalyst and due to potential effects of newly enacted margin rules and the persistent political uncertainties, preferred to liquidate their holdings to limit further losses on their already vulnerable portfolios.

Investor participation decreased as reflected by decrease in average daily turnover by around 27% causing the average daily turnover to fall below BDT 400 Crore level. Investors' trades in this week focused on Engineering scrips followed by Pharmaceuticals and Textile scrips. All sectors went negative, with the Paper & Printing sector suffering the worst (-17%).

Market capitalization stands at USD 55.1 Billion*.

*(USD 1 = BDT 122.34 as on November 13, 2025).
