01. Market Commentary

DSEX ended in red for the week decreasing by 39.56 points [0.79%] compared to the previous week. It stands at 4959.99 points.

Index started with a huge negative day registering a decrease of more than 50 points to start of the week due to rising geopolitical adversities, rising domestic gas crisis and possibly due to capitalizing on the gains in the previous several weeks sessions. Although, the market tried to rebound but the turnover was too low as investors were cautious and adopted a wait and see approach to determine the market direction going forward.

Investor participation decreased significantly as reflected by decrease in average daily turnover by around 20% causing the average daily turnover to fall below BDT 400 Crore level. Investors' trades in this week focused on Pharmaceuticals scrips followed by General Insurance and Bank scrips. In terms of sectoral returns, the Pharmaceuticals sector generated the highest positive return of 0.85%, while the Paper & Printing sector was the highest loser with a return of -3.51%.

Market capitalization stands at USD 55.9 Billion*.

*(USD 1 = BDT 122.42 as on January 15, 2026).
