01. Market Commentary

DSEX ended in red for the week decreasing by 0.86 points [0.02%] compared to the previous week. It stands at 5256.84 points.

Index depicted a mixed performance over the week and remained flat compared to the previous week. Investors in the week began on a positive note in anticipation of favorable December earnings and ease in geopolitical tensions. However, the positive sentiment was short lived as the negotiations failed to bring any fruitful definitive outcome equipped with lack of any catalyst in the domestic market. This caused the market to fall which caused the market to fall slightly below the previous weeks' end.

Investor participation increased by around 22% compared to the previous week bringing the average turnover above the BDT 800 Crore mark. Investors' trades in this week focused on Engineering scrips followed by Pharmaceuticals and General Insurance scrips. In terms of sectoral returns, the Ceramics sector was the highest positive with 4.84% while the Cement sector was highly negative with -2.88%.

Market capitalization stands at USD 55.8 Billion*.

*(USD 1 = BDT 122.78 as on April 16, 2026).
