01. Market Commentary

DSEX ended in green for the week increasing by 46.18 points [0.83%] compared to the previous week. It stands at 5578.33 points.

Index went positive for the second straight week as investors hunted for bargain scrips for future gains. The market rose in the opening sessions of the week but later was quite sideways as the price hikes in fuel prices raised concerns over future profitability of listed companies and potential rise in inflationary pressure which caused the investors to observe the market and maintain cautiousness.

Investor participation rose by 42% as compared to the previous week, increasing the average daily turnover above BDT 700 Crore level. Investors' trades in this week focused on Textile scrips followed by General Insurance and Pharmaceuticals scrips. In terms of sectoral returns, the Mutual Funds sector was the highest positive while the Engineering sector was the highest negative.

Market capitalization stands at USD 56.1 Billion*.

*(USD 1 = BDT 123.18 as on September 24, 2026).

02. Related Regulatory Decisions

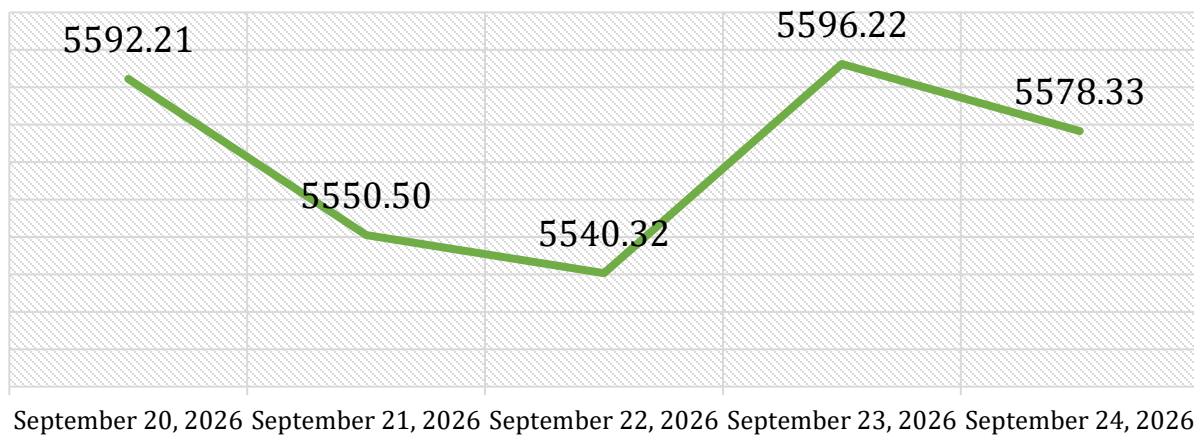

There were no major regulatory decisions taken during the week.

03.Secondary Market Highlights
